FROM: R. D. Fukai, Director 
SUBJECT: Capitol Lake Adaptive Management Plan for 2003-2013

Enclosed is a copy of the adopted Capitol Lake Adaptive Management Plan for 2003-2013, commonly referred to as the CLAMP 10-Year Plan. It is a comprehensive plan for Capitol Lake that addresses environmental, community and financial issues in a coordinated manner.

The 10 Year Plan contains a total of 14 Management Objectives, which range from sediment management to goose control. It also identifies required actions, estimated costs, management responsibilities and a report card to help ensure accountability.

I presented the 10-Year Plan to the State Capitol Committee (SCC) on December 11, 2002. The SCC found it to be an excellent document for managing the long-term conditions in Capitol Lake. However, the Committee concurred with my recommendation to defer consideration of management objective #2: "Complete an estuary feasibility study to determine a long-range management decision." I must fully understand how such a study would be funded, coordinated, and implemented before I can consider it for implementation. In this regard, I look forward to working with the CLAMP Steering Committee jurisdictions to secure the necessary information.

GA will immediately begin to implement the thirteen (13) adopted Management Objectives in the CLAMP 10-Year Plan. Once the necessary information is secured for Management Objective #2, the SCC expressed an interest to reconsider that item.
